SKID PAN EXPERIENCE

ADVANCED CAR CONTROL

This program allows participants the opportunity to understand the causes of and recovery techniques for skids and slides. The program is conducted on a unique skidpan circuit (one of only a few in Australia) which is constructed of concrete and which is treated with diesel and water to make it super slippery. The session commences with a short drivers brief and then in-car demonstrations with our experienced driving instructors. Participants then get one-on-one personalised in-car training with our instructors offering advice on car control techniques like steering, vision, vehicle safety systems (ESC, TC) and advanced car control. After each participant has completed several training sessions, the program ends with a timed competitive driving challenge and/or team building activity. The program covers:

- ✓ **Skid and Slide Recognition (Understeer, Oversteer, Spins)**
- ✓ **Skid Prevention Techniques**
- ✓ **Skid Control (Reactive Throttle Control, Balance Points, Posture, Steering, Vision)**

Our Skid Pan Experience is commonly completed by car clubs and social groups. Corporate groups attend as part of Conferences, Christmas Parties or Team Building Activities.

VENUE: Mt. Cotton Training Centre, Cornubia (near Logan Hyperdome)
 - 50 minutes from Brisbane CBD or Surfers Paradise (Gold Coast)

DURATION: 4 hour session
 Timeslots are 8:30am – 12:30pm, 12:30pm – 4:30pm or 5:00pm – 9:00pm (under lights)
